## TECHNICAL SKILL

- **Programming Languages:** JavaScript, Python, HTML/CSS
- **Frontend:** React.js, Angular.js, Responsive Design, CSS
- **Backend:** Node.js, Express.js, RESTful API Design, Error Handling
- **Database:** MongoDB, SQL
- **Development Tools:** Git/GitHub, Postman, MongoDB Compass, VS Code, npm, Agile
- **Authentication & Security:** JWT, Role-Based Access Control (RBAC), Input Validation

## PROJECTS

### Property Listing Platform | Full-Stack Application

- Built and deployed a full-stack real estate platform (**Better Parker**) using React.js, Node.js, Express.js, and MongoDB, supporting scalable property management and advanced search functionality for 1,00+ listings
- Developed 20+ RESTful APIs with JWT authentication, refresh token rotation, Joi validation, proper HTTP status handling, and secure backend architecture for production-ready applications
- Optimized MongoDB performance using compound indexing, aggregation pipelines, geospatial queries, filtering, pagination, and sorting, reducing property search response time from 800ms to 150ms

### CampusCV | Full-Stack Application

- Built a full-stack AI-powered resume optimization platform using React.js, Node.js, Express.js, and MongoDB with secure authentication and scalable backend architecture
- Integrated the OpenAI API for AI-driven resume enhancement, ATS score analysis, and job description matching with robust error handling and response management
- Implemented JWT authentication, secure file upload functionality using Multer, and optimized MongoDB schema design with indexing for efficient resume and user data management

## PROFESSIONAL EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                   |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|
| <b>Softiwa Technology (Full stack developer)</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Aug 2025- Present |
| <ul style="list-style-type: none"><li>• Developed and optimized 20+ responsive Angular components with SCSS for a School Management ERP system, supporting 500+ concurrent users with improved UI performance and usability</li><li>• Built and maintained 15+ RESTful APIs using Java, Spring Boot, and MySQL for student enrollment, fee management, scheduling, and role-based user operations.</li><li>• Implemented JWT authentication, refresh token handling, and RBAC authorization for Student, Teacher, and Admin modules to ensure secure access control</li></ul> |                   |

## EDUCATION

|                                                  |           |
|--------------------------------------------------|-----------|
| <b>Bachelor of Computer Applications (B.C.A)</b> | 2023-2026 |
| Meerut Institute of Technology                   |           |
| <b>Intermediate (12th)</b>                       | 2020-2021 |
| Saraswati Vidya Mandir Inter College             |           |

## CERTIFICATIONS & ACHIEVEMENTS

---

- MongoDB Developer Certification (In Progress)
- Python Programming Certification
- Active GitHub contributor with 15+ public repositories demonstrating MERN stack expertise
